

PUSPITA NANDI

CSE Undergraduate • Backend Developer • Technical Builder

Dhaka, Narayanganj, Bangladesh | puspita.official08@gmail.com | [GitHub: puspitapuja19](https://github.com/puspitapuja19)

PROFILE

Computer Science and Engineering undergraduate and backend developer with hands-on experience planning and building full-stack and ML-driven projects with Python, FastAPI, PostgreSQL and React. Comfortable breaking large builds into structured phases, coordinating with collaborators, and shipping deployed, working products. Self-directed learner with a practical, execution-focused mindset and clear written and verbal communication in English and Bangla.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE) | Daffodil Institute of IT, Dhaka, Narayanganj 2024 – 2029

- CGPA: 3.20 / 4.00 • Currently 2nd Year, 3rd Semester
- Coursework: Linear Algebra, Digital Logic Design, Data Structures, Algorithms, Operating Systems, Database Management Systems, Computer Networks, Computer Architecture

PROJECTS

ScamShield | AI Scam Detection App – Full-Stack 2026

- Users upload a screenshot of a suspicious SMS, email or chat; the app extracts text with bilingual (English and Bengali) OCR, analyses it with an LLM, and returns a risk score, red flags and a plain-language explanation.
- JWT authentication with bcrypt hashing. Deployed on Render, Vercel and Supabase.
- *Tech:* FastAPI, React, PostgreSQL, EasyOCR, Groq API, Docker, Tailwind CSS • [GitHub](#) • [Live demo](#)

Expense Tracker | Full-Stack Project 2026

- Secure user authentication, expense CRUD, category-wise spending summaries and monthly budget tracking with visual progress indicators; user-scoped data with protected routes.
- *Tech:* FastAPI, React, MySQL, SQLAlchemy, Framer Motion • [GitHub](#)

ExamPulse | Frontend Project 2026

- Banglish-flavoured web app that scores exam readiness (Aura Score out of 100) with live slider feedback, penalty-based scoring and 5 verdict tiers. Zero dependencies, deployed on Netlify.
- *Tech:* HTML, CSS, JavaScript • [GitHub](#) • [Live demo](#)

CalcMate | Desktop Project 2026

- Beginner-friendly desktop calculator with a dark UI and fixed 400x600 layout, built with an object-oriented Calculator class; standard library only. *Tech:* Python, Tkinter • [GitHub](#)

CERTIFICATIONS

Legacy Responsive Web Design V8 | freeCodeCamp April 2026

Basics of SQL Statements & Indexes | UniAthena (Cambridge International Qualifications, UK) May 2026

AI Security & Governance | Securiti 2026

Business Analytics with Excel | Simplilearn SkillUP (Microsoft) March 2026

Python from Zero-to-Hero (Beginner Level) | Udemy December 2025

SKILLS

Technical: Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, scikit-learn, React

Also worked with: JavaScript, MySQL, HTML/CSS, Tailwind CSS, Tkinter, REST APIs, JWT authentication

Professional: Cross-team coordination on multi-phase projects, ownership of deliverables, self-directed learning

Tools: MS Word, Excel, PowerPoint

Communication: Clear written and verbal English and Bangla
